PIYUSH KOSHTI

AWS Cloud / DevOps Engineer

Ahmedabad, Gujarat, India | Phone: +91 97246 25236 | Email: piyushdevops410@gmail.com
LinkedIn: in.linkedin.com/in/piyush-koshti-devops | GitHub: github.com/piyushdevops410

PROFESSIONAL SUMMARY

AWS Cloud / DevOps Engineer with 6+ years of software development experience, including DevOps responsibilities since Feb 2025. Built 4 end-to-end DevOps projects covering AWS infrastructure provisioning with Terraform, Jenkins CI/CD pipelines, Docker, Kubernetes orchestration on EKS, Helm, HPA autoscaling, Trivy scanning, and Prometheus/Grafana monitoring. Hands-on with 10+ AWS services including EC2, ECS, Fargate, EKS, ECR, S3, IAM, VPC, RDS, and CloudWatch. Seeking AWS Cloud Engineer, DevOps Engineer, or Cloud Infrastructure roles.

SKILLS

Cloud & AWS: Amazon Web Services (AWS), Amazon EC2, EKS, ECS, Fargate, ECR, S3, IAM, VPC, RDS, CloudWatch, Elastic Load Balancing

CI/CD & Containers: Jenkins, CI/CD Pipelines, Docker, Containerization, Kubernetes, Helm, Horizontal Pod Autoscaler (HPA), Git, GitHub, GitHub Webhooks, Deployment Automation

Infrastructure as Code: Terraform

Monitoring & Observability: Prometheus, Grafana, Node Exporter, Alertmanager, AWS CloudWatch

Operating Systems & Scripting: Linux, Ubuntu, Bash, Shell Scripting

Security: Trivy, SSH, IAM

Application Technologies: Node.js, REST APIs, PHP, WordPress

Currently Learning: AWS Lambda, API Gateway, Python, FastAPI

PROFESSIONAL EXPERIENCE

Software Engineer (DevOps Responsibilities) | EZ Infoways, Ahmedabad, Gujarat Feb 2025 – Present

- Managed Linux server operations and deployment workflows for development teams using 2 core tools: Git and GitHub.
- Built CI/CD pipelines and containerized deployments using 3 tools: Jenkins, Docker, and Kubernetes.
- Troubleshot 4 issue categories, application, server, deployment, and environment, in collaboration with development teams.
- Delivered 4 production-style DevOps projects on AWS and Kubernetes to expand cloud infrastructure and automation expertise.

Sr. Software Engineer | KudosIntech Software Pvt. Ltd., Ahmedabad, Gujarat Aug 2023 – Jan 2025

- Developed WordPress websites, themes, plugins, and REST API integrations over 18 months.
- Delivered 3 solution types, WooCommerce, multilingual, and multisite, with custom WordPress functionality.
- Managed 4 operational areas: deployments, server operations, troubleshooting, and website performance optimization.

Sr. Software Engineer | World Web Technology Pvt. Ltd., Ahmedabad, Gujarat Mar 2023 – Aug 2023

- Developed 4 types of WordPress deliverables: websites, themes, plugins, and WooCommerce solutions.
- Executed 3 recurring operations: website backup and restore, deployment support, and client-specific customizations.

WordPress Developer | ManTech Pvt. Ltd., Ahmedabad, Gujarat Jan 2022 – Feb 2023

- Built custom WordPress themes and functionality using 3 technologies: PHP, Advanced Custom Fields, and REST APIs.
- Debugged and maintained website integrations and customizations over 14 months.

WordPress Developer | T M Technologie, Ahmedabad, Gujarat Aug 2018 – Dec 2021

- Maintained WordPress websites, themes, plugins, and custom integrations for 3+ years.
- Delivered 3 support functions: performance optimization, debugging, and deployment support.

DEVOPS & AWS CLOUD PROJECTS

DevOps Production Platform AWS | Terraform | Jenkins | Docker | ECR | ECS/Fargate | CloudWatch

- Built an end-to-end AWS delivery pipeline for a containerized Node.js application using 6 integrated tools: Terraform, Jenkins, GitHub, Docker, ECR, and ECS/Fargate.
- Provisioned 5 AWS service areas (EC2, IAM, VPC, S3, load balancing) as code using Terraform.
- Automated build and deployment with Jenkins CI/CD pipelines triggered by GitHub webhooks.
- Deployed container images from Amazon ECR to Amazon ECS/Fargate and monitored workloads with CloudWatch.

Kubernetes CI/CD Production Platform Kubernetes | Docker | Jenkins | GitHub | Helm | Linux

- Deployed a containerized Node.js application on Kubernetes with a 3-replica Deployment and Service networking.
- Containerized the application with Docker using a lightweight Node.js Alpine base image.
- Diagnosed 5 categories of Kubernetes issues: pod health, service connectivity, application logs, deployments, and resource status.
- Documented 4 key artifacts: Git branching strategy, deployment workflow, troubleshooting procedures, and architecture.

Production-Grade AWS EKS CI/CD Platform AWS EKS | Jenkins | Docker | ECR | Terraform | Kubernetes | Helm | Prometheus | Grafana | HPA | Trivy

- Designed and implemented an end-to-end CI/CD pipeline using Jenkins to build, test, scan, and deploy containerized applications to Amazon EKS.
- Provisioned AWS infrastructure using Terraform, including EKS, networking, IAM, and Amazon ECR resources following production-oriented deployment practices.
- Containerized the application with Docker and integrated Amazon ECR for versioned container image storage and Kubernetes deployments.
- Deployed highly available applications on EKS using Kubernetes Deployments, Services, ConfigMaps, Secrets, and Helm-based configuration.
- Implemented Kubernetes Horizontal Pod Autoscaling (HPA) based on resource utilization to support variable application workloads.
- Integrated Prometheus and Grafana for Kubernetes/application monitoring, dashboards, resource utilization, and operational visibility.
- Integrated Trivy into the CI pipeline to scan container images for known security vulnerabilities before deployment.
- Implemented rolling deployments and health probes to improve application availability and reduce deployment downtime.
- Documented CI/CD workflows, infrastructure, troubleshooting procedures, monitoring setup, and deployment architecture in GitHub.

Monitoring & Observability Platform Prometheus | Grafana | Node Exporter | Alertmanager | Kubernetes

- Deployed a 4-component monitoring stack (Prometheus, Grafana, Node Exporter, Alertmanager) for Linux and Kubernetes workloads.
- Collected 3 core system metrics (CPU, memory, disk) with Node Exporter and Prometheus.
- Built Grafana dashboards tracking 3 Kubernetes signals: pod resource usage, restarts, and health.
- Configured alerting and troubleshooting workflows using 2 tools: Prometheus and Alertmanager.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science
Kalol Institute of Information Technology, Gujarat University

ADDITIONAL INFORMATION

Target Roles: AWS Cloud Engineer | DevOps Engineer | Junior DevOps Engineer | Cloud Infrastructure Engineer
Location: Ahmedabad, Gujarat, India
